Voice Controlled Clinical Assistant
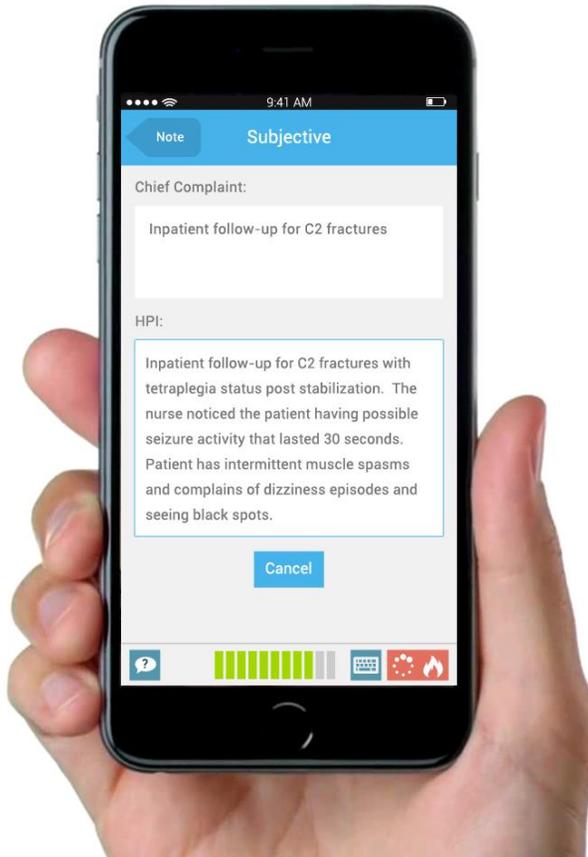

MDLog app

SECURE DATA

All PHI (Patient Health Information) is encrypted as per HIPAA guidelines for secure transmission & storage.

CLOUD SOLUTION

Unlike a typical hosted solution MDLog is a scalable SaaS solution that can be customized through highly configurable options without increasing the price.

HIPAA COMPLIANCE

The application and data are housed in a HIPAA compliant data center. Additionally access to patient data and application functionality is based on user's role thus restricting them to entitled data.

9:41 AM

Note **Subjective**

Chief Complaint:

Inpatient follow-up for C2 fractures

HPI:

Inpatient follow-up for C2 fractures with tetraplegia status post stabilization. The nurse noticed the patient having possible seizure activity that lasted 30 seconds. Patient has intermittent muscle spasms and complains of dizziness episodes and seeing black spots.

Cancel

Upgrade to EHR if you choose

Document Quickly for More Patient Time

Total Notes documented by Practitioners in a day

+200%

Ambulatory EMR	Handwritten	MDlog
8	14	24

Customer feedback indicates that MDLog users are currently documenting up to 24 clinical notes in a day. Due to this level of efficiency Practitioners are able to cover lot more patients and hence realizing higher monthly revenue by using MDlog for their Long-Term Care Practice instead of an EMR. MDLog also gives users the convenience to dictate instant notes anytime anywhere using a wide range of devices including iPhone, iPad, Android Phone/Tablet, PC and Mac.

Upgradable to EHR

MDLog can be seamlessly upgraded to a complete certified web based EHR if and when customer chooses. It can be accessed anytime anywhere from any Internet connected Tablet or Computer.

FLEXIBLE WORKFLOW

Physicians have the flexibility to document instantly with dictation (Speech Recognition), or by clicking through templates or doing a combination of both.
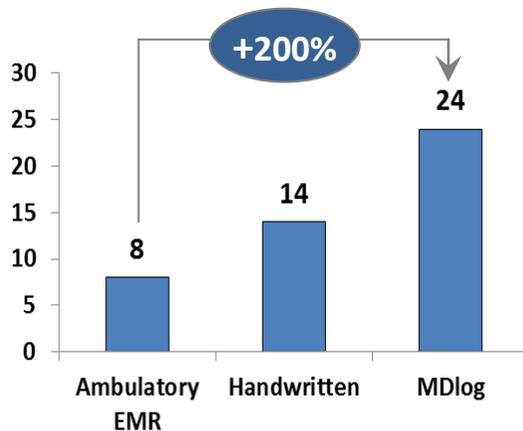

ZERO CAPITAL COST

In today's world of falling reimbursement rates MDLog allows Practitioners to improve their efficiency and provide more patient care without any capital demands.
